Special Moves Guide & Controls Reference

Controls Overview

Mouse Move selected rod up/down	L-Click Forward kick
R-Click Back kick	Q W E R Select rod (GK/DEF/MID/ATK)
F G H J Role-specific special moves	V Spinneroni (all rods)
B Fake Shot (all rods)	B B Dribble Shot (double-tap)
T Request table shake	Esc Release mouse lock

Ball Spin Physics

The ball has a spin property that affects its trajectory via the **Magnus effect**. When the ball spins, it curves perpendicular to its direction of travel. Spin is applied by the **Spinneroni** move and slightly by normal kicks if the rod is moving. Spin decays over time and partially reverses on wall bounces. A spinning ball shows a rotating cross pattern with a purple tint — the faster the spin, the more visible the indicator.

GOALKEEPER (GK)

Selfie Shot

F F

GK

○ ○ ○ ○ ○

Score on yourself. A self-goal for laughs, trolling, or honoring a gentleman's agreement.

HOW TO EXECUTE

Select GK rod (Q). With the ball near your goalkeeper, double-tap **F** within 500ms to confirm. The ball fires into your own goal.

SKILL REQUIRED

Courage (or a sense of humor). No mechanical skill needed — just the will to do it.

DEFENDER (DEF)

Spaghetti Shot F DEF ○○○○○

Maximum power straight shot from defense toward the enemy goal. The ball fires like a rocket.

HOW TO EXECUTE

Select DEF rod (W). Position the ball centered on one of your defenders. Press **F**. The shot fires straight at max speed.

SKILL REQUIRED

Ball centering. Accuracy depends on how perfectly the ball is aligned with your player's center. Off-center = random deviation. Perfect center = laser-straight shot.

Pepperoni G DEF ○○○○○

Random wall-bounce lucky shot. The ball fires at a random angle, bounces off a wall, and may find its way to the goal.

HOW TO EXECUTE

Select DEF rod (W). Ball near your defender. Press **G**. The ball fires at a random wall angle with high power.

SKILL REQUIRED

None — it's a gamble! The angle is randomized. Sometimes genius, sometimes terrible. Use when you're feeling lucky.

Cornetto / Double Cornetto

H

DEF

○○○○○

Cornetto: Ball sticks to your player. Move the rod to control it, then click to fire a max-power straight shot.

Double Cornetto: When the ball is between two defenders, it auto-dribbles between them first, then you click to shoot.

HOW TO EXECUTE

Select DEF rod (W). Press **H** with ball near defender. The ball sticks to the nearest man (or dribbles between two). Move the rod to position, then **click** to fire. Best timing window is around 1 second into the stick phase.

SKILL REQUIRED

Rod control + timing. Keep smooth, controlled movements while the ball is stuck. Click at the optimal timing window for maximum shot accuracy. Too early or too late = reduced accuracy.

Yoyo Shot

J

DEF

○○○○○

Fires the ball at the wall beside the enemy goal. The ball bounces off the back wall and returns to your defender area — like a yoyo.

HOW TO EXECUTE

Select DEF rod (W). Ball near defender. Press **J**. The ball fires toward the enemy back wall, aiming beside the goal. It bounces and returns to your side.

SKILL REQUIRED

Positional awareness. The ball automatically aims beside the goal to avoid scoring. Use it as a playful reset or to confuse opponents. Follow up with another shot when it returns.

MIDFIELD (MID)

Dory Shot

F

MID

○○○○○

Powerful straight shot from midfield. Accuracy is inversely proportional to your mouse movement — the stiller you are, the straighter it goes.

HOW TO EXECUTE

Select MID rod (E). Ball near midfield. **Stop moving your mouse completely**, then press **F**. The shot fires at max power.

SKILL REQUIRED

Mouse stillness. Any mouse movement at the moment of pressing F reduces accuracy. Master players can position the ball, freeze, and fire with perfect precision. It's a test of composure under pressure.

The Eliza

G

MID

○○○○○

Rapidly slides the rod sideways. The ball slams into the wall at maximum speed and bounces in a random direction. Pure chaos.

HOW TO EXECUTE

Select MID rod (E). Ball near midfield. Press **G**. The rod oscillates rapidly for a brief moment. If the ball contacts a player during the oscillation, it flies toward the nearest wall.

SKILL REQUIRED

Embrace the chaos. No precision needed — the direction is intentionally unpredictable. Best used to disrupt a stalemate or when you're behind and need a miracle.

Diagonal Shot

H

MID / ATK

○○○○○

Shoots diagonally from the edge of the rod toward the opposite corner of the enemy goal. Only activates when the ball is at the top or bottom extremity of the rod.

HOW TO EXECUTE

Select MID (E) or ATK (R) rod. Move the rod so the ball is at the very top or bottom of the rod's range. Press **H** (MID) or **G** (ATK). The ball fires diagonally toward the opposite goal corner.

SKILL REQUIRED

Ball positioning. The ball MUST be at the extremity of the rod — the move fails otherwise. Position the ball at the top to shoot toward the bottom goal corner, or vice versa. Requires spatial awareness of the table.

ATTACKER (ATK)

PP Square

F

ATK

○○○○○

Ball auto-dribbles between your attackers. Click at the perfect moment to fire a power shot at the goal.

HOW TO EXECUTE

Select ATK rod (R). Ball near attackers. Press **F** to start the dribble. The ball bounces between your attackers automatically. **Click** during the dribble to shoot. "CLICK TO SHOOT!" appears on screen.

SKILL REQUIRED

Timing. The shot quality depends on WHEN you click. Best timing window is around 1 second into the dribble (peaks at ~60 frames). Too early, too late, or after 3 seconds = weak/inaccurate shot. Auto-cancels after 3 seconds.

ALL RODS (UNIVERSAL)

Spinneroni

V

ALL

○○○○○

The ultimate spin shot. Applies maximum spin to the ball, causing it to curve dramatically via the Magnus effect. The hardest move in the game.

HOW TO EXECUTE

1. Ball must be near your selected rod.
2. Press **V** to enter charge mode. A spin charge bar appears.
3. **Rapidly move mouse left/right** to build spin charge. The faster and more you move, the more spin.
4. **Click** to fire the shot with accumulated spin.
5. Auto-fires after 2 seconds if you don't click.

SKILL REQUIRED

Maximum horizontal mouse speed + timing. You must generate rapid horizontal mouse movement during the 2-second charge window while NOT losing control of your rod position. The ball curves proportionally to spin charge. Full charge = dramatic curve that can bend around defenders. This is the highest skill-ceiling move in the game.

Fake Shot

B

ALL

○●○○○

Your rod performs a kick animation, but intentionally misses the ball. The visual deception can trick your opponent into reacting prematurely.

HOW TO EXECUTE

Any rod selected. Press **B**. The rod swings as if kicking, but the foot doesn't extend far enough to contact the ball. Works even without ball proximity.

SKILL REQUIRED

Deception. No mechanical skill — it's a mind game. Use before a real shot to bait your opponent into moving their defender. Timing the fake before the real attack is key.

Dribble Shot

B B

ALL

○○○○○

Double-tap B: first tap fakes, second fires a real max-power shot. A quick deception-into-attack combo.

HOW TO EXECUTE

Any rod selected, ball nearby. Tap **B** once (fake kick plays), then tap **B** again within 500ms. The second tap triggers a real powerful kick. The rapid fake-to-real catches opponents off guard.

SKILL REQUIRED

Fast double-tap timing. The two taps must be within 500ms. Too slow = two separate fake shots. The deceptive rhythm is the skill — your opponent sees the fake and relaxes, then the real shot arrives.

QUICK REFERENCE

Move	Key	Rod	Difficulty	Core Skill
Selfie Shot	F F	GK	★	Courage
Spaghetti Shot	F	DEF	★★★	Ball centering
Pepperoni	G	DEF	★	Luck
Cornetto	H + Click	DEF	★★★★	Rod control + timing
Yoyo Shot	J	DEF	★★	Positional awareness
Dory Shot	F	MID	★★★★	Mouse stillness
The Eliza	G	MID	★	Chaos
Diagonal Shot	H / G	MID/ATK	★★★	Ball positioning
PP Square	F + Click	ATK	★★★★	Click timing
Spinneroni	V + Move + Click	ALL	★★★★★	Mouse speed + timing
Fake Shot	B	ALL	★	Deception
Dribble Shot	B B	ALL	★★★	Double-tap speed
